European Journal of Operational Research 51 (1991) 412–413
North-Holland

Contents Volume 51

1 A survey of maintenance models for multi-unit systems (*Invited Review*)
D.I. Cho and M. Parlar
24 Modelling a fertiliser distribution system (*Case Study*)
R.R.K. Sharma
35 Performance evaluation in a Local Government: The case of a Social Work Department meals-on-wheels service (*Case Study*)
R. Ball and A. Beckett
42 Evaluating software controls for electronic data interchange (*Case Study*)
D.L. Adolphson and J.V. Hansen
47 Optimal control of variable rate coding with incomplete observation in integrated voice/data packet networks
H. Saito
65 Combining forecasts given different types of objectives
G.R. Reeves and K.D. Lawrence
73 Multi-item, multi-level lot sizing with an aggregate capacity constraint
Y. Roll and R. Karni
88 Branch and bound algorithm for the flow shop with multiple processors
S.A. Brah and J.L. Hunsucker
100 On the complexity of generalized due date scheduling problems
N.G. Hall, S.P. Sethi and C. Sriskandarajah
110 A decomposition approach to multi-project scheduling
R.F. Deckro, E.P. Winkofsky, J.E. Hebert and R. Gagnon
119 Bicriteria network flow problems: Continuous case
H. Lee and P.S. Pulat
127 Set partition by globally optimized cluster seed points
J. Pintér and G. Pesti
136 Note on an optimization model for pavement marking systems
S.M. Easa
141 Book Reviews, *L.F. Gelders (ed.)*

155 Cyclical queueing systems (*Invited Review*)
G.M. Campbell
168 O.R. techniques for use in redesigning manufacturing and associated business systems
A. Tobias
179 Manpower planning models and their estimation
S. McClean
188 Sequencing jobs on a single machine with a common due date and stochastic processing times
S.C. Sarin, E. Erel and G. Steiner
199 Approximation algorithms for single-machine sequencing with delivery times and unit batch set-up times
S. Zdrzałka
210 Analytical perturbations in Markov chains
H. Baruh and T. Altiok
223 On fuzzy tournaments and their solution concepts in group decision making
H. Nurmi and J. Kacprzyk
233 Multi-level programming and conflict resolution
G. Anandalingam and V. Apprey
248 Exact colouring algorithm for weighted graphs applied to timetabling problems with lectures of different lengths
M. Čangalović and J.A.M. Schreuder
259 Lexicographic geometric programming
M. Luptáčik and F. Turnovec
270 A finite algorithm for solving the generalized lattice point problem
J. Fülöp

283 Mathematical programming formulations for machine scheduling: A survey, (*Invited Review*)
J. Blazewicz, M. Dror and J. Weglarz

0377-2217/91/$03.50 © 1991, Elsevier Science Publishers B.V. (North-Holland)

301 Operational research in the Danish steel industry,
Michael Niels Thorsen and René Victor Valqui Vidal
310 The inventory joint replenishment problem with a general class of joint costs,
D.R. Atkins
313 Optimal buffer inventories for multistage production systems with failures,
P.A. Jensen, Ramakrishnan Pakath and James R. Wilson
327 Stochastic optimization of reservation systems,
J.T. Virtamo and S. Aalto
338 The hierarchical network design problem with transshipment facilities,
J. Current and H. Pirkul
348 Optimal assignment of slack due-dates and sequencing of jobs with random processing times on a single machine,
T.C.E. Cheng
354 Primal-dual approach to the single level capacitated Lot-sizing problem,
Sebastian Lozano, Juan Larraneta and Luis Onieva
367 The equivalence of an LCP to a parametric linear program with a scalar parameter,
Giacomo Patrizi
387 An extension of a greedy heuristic for the knapsack problem,
D.J. White
400 Data dependent worst case bound improving techniques in zero-one programming,
O. Oğuz
405 Cooperative games arising from network flow problems,
E.C. Rosenthal
412 Contents Volume 51
